

HAGOPIAN INK

Building bold brands for the future of health.

BRAND EVOLUTION FOR HEALTH + MEDTECH

— Experience

We work with clients in...

- Medical + Wellness
- Technology + Energy
- Community + Nonprofit
- Entertainment + Hospitality
- Luxury + Lifestyle

And we help them with...

- Brand identity + positioning
- Omnichannel campaign marketing
- Web design + development
- Email marketing + message strategy
- Direct mail and print media

ACROSS EVERY DISCIPLINE, OUR FOCUS REMAINS THE SAME:
DESIGN THAT MOVES PEOPLE—AND MOVES INDUSTRIES FORWARD.

Evolving the world's leading brands since 2002.

Outpatient Cardiopulmonary Rehab and Recovery Right at Home

RecoveryPlus health is a clinically proven remote cardiac rehab platform for anyone with a chronic heart condition, or those at risk.

Through tailored exercise plans and effective care management, patients are empowered to take control of their heart health and wellness wherever they are.

[Learn about it today](#)

Changing Habits, Saving Lives

Remote cardiopulmonary rehab and care through RecoveryPlus health is a life-changing and life-saving service that increases recovery and enhances quality of life.

For healthcare professionals, it maximizes compliance, creates better outcomes, and delivers data-driven, quantifiable results.

[Maximize your cardiopulmonary practice](#)

Easy to Access, Easy to Use

RecoveryPlus health is powered by an FDA-cleared telehealth platform for providers to set up and administer remotely, with an easy interface and app from any smartphone, tablet, or computer.

Just like traditional on-site cardiopulmonary rehab, it's a medically approved program reimbursable by Medicare, Medicaid, and most commercial insurance plans.

An ER trip costs 12x as much as a visit to your MD

Emergency Room visits are reduced dramatically

We keep you on track to avoid unnecessary ER visits and expensive re-hospitalizations—so you get

“In it for Life” Campaign

Viant, a global leader in medical device design and manufacturing, partnered with us and Reinvent the World over six years to strengthen and unify their brand voice. Together, we developed the “I’m in it for life” campaign—an impactful narrative that built credibility, increased industry awareness, and clearly defined Viant’s unique value.

We brought the campaign to life across print trade media, targeted email marketing, and digital display ads. A storytelling-focused email series welcomed new contacts with a white paper download and introduced them to Viant’s mission, while ongoing emails used custom visuals and concise messaging to deepen engagement and drive brand recognition.

The result: a cohesive, resonant campaign that elevated Viant’s visibility and forged a lasting connection with its executive audience.

My speed to market can help speed her recovery.
I'm in it for life.

**END-TO-END CAPABILITIES.
FOR REAL.**

Bringing your medical technology solutions to life.

Viant combines true end-to-end capabilities with deep materials expertise to bring your medical technology solutions to life.

We're more than a strategic manufacturing partner. We're bringing Lean to life to support our customers in expanding their product offerings, optimizing their supply chains, and improving quality while managing costs on a global scale.

At Viant, we're in it for life: for the lives of our customers and the lives of the patients who benefit from life-enriching medical devices.

WHY VIAN?

**BIG-COMPANY RESOURCES;
SMALL COMPANY ATTENTION**

Viant brings the best of both worlds

At Viant, we deliver a unique combination: the capabilities and resources of a large company, paired with the customized services and personal attention of a small company.

Our leaders have deep experience in the OEMs we serve and understand the challenges you face. They've created a culture of relentlessly upholding your reputation for delivering high-quality, high-value devices that your customers depend on.

Leveraging this culture of excellence, we serve many medical specialties in several markets, including surgical, orthopedics, and more.

Awakening a New Standard of Sleep Management

Revolutionizing patient-focused, physician-driven sleep management—one facility at a time

Welcome to Persante

Why Disordered Sleep Can Be a Nightmare

Sleep loss and chronic sleep disorders, such as insomnia and sleep apnea, are among the most common yet frequently overlooked health problems. They can hinder daily functioning, health, and longevity. Untreated sleep apnea, for example, can lead to serious health consequences and comorbidities, including cardiovascular disease, stroke, diabetes, and depression. Yet, the reality is, sleep disorders are both highly treatable and preventable. Backed by advanced technology, a credentialed clinical team, and a full suite of HSAT devices, Persante helps healthcare partners optimize sleep centers and enhance patient outcomes.

[Learn More](#)

Stop ignoring the impact of sleep

9-12 M

It is estimated that 50 to 70 million Americans suffer from a chronic sleep disorder

0/1

1 in 3 adults do not regularly get the recommended amount of uninterrupted sleep they need to protect their health

14%

Obstructive sleep apnea affects nearly 30 million Americans, and an estimated 80% of cases remain undiagnosed

24/7 Sleep Medicine Support

An End-to-End Experience

Redefining Sleep Care—From Lab to Home

Though 70 million Americans are affected by sleep disorders, the pathway from diagnosis to treatment remains fragmented. Persante fills the gap with a quickly scalable, end-to-end experience — including staffing, technology, and durable medical equipment (DME). We cover the full continuum from sleep diagnostics and clinical expertise to operational support and facility design. The difference is better patient outcomes, reduced rates of hospital readmissions, higher profitability and volume, and less stress on your system—so you won't have to lose sleep along the way.

Smarter Sleep Starts Here

As a trusted leader in sleep lab management and home sleep apnea testing, we partner with hospitals, health systems, academic centers, ACOs, insurers, and patients to deliver seamless, end-to-end solutions for diagnosing and treating sleep disorders.

How we deliver value

**We put customers first**

We nurture long-term relationships and are a preferred supplier, with a customer retention of +95%.

**We offer end-to-end solutions**

We provide our customers a one-stop shop with +30 in-house engineering & manufacturing capabilities.

**We deliver as a trusted partner**

We reliably develop solutions to customer challenges and needs—even when others can't.

**We're committed to quality**

We embed a quality mindset in everything we do and strictly control for quality, with 9 in-house labs.

**We continually improve**

We continue to expand our capabilities and enable cost improvements for our customers.

**We enable fast growth**

We have the resources, capabilities, and speed to scale production and enable growth for our customers.

Vertically integrated manufacturing campus

Wherever you design, we have the capabilities and expertise to manufacture it with quality and precision. Our manufacturing campus in Dayton, Ohio, offers more than 30 capabilities in house, enhancing speed and control of quality and cost.

With our vertically integrated facilities, we have the flexibility to help you quickly iterate then scale from prototype to fully ramped production to speed time to market. A skilled strategic sourcing team, backed by a reliable and simplified supply chain, enable you to focus on innovation with confidence.

[Check Out Capabilities →](#)

Long-term outlook

We continually invest in the technology, infrastructure, and facilities we need to help our customers bring their innovations to life—with an eye on the long-term horizon. As a family-owned company, our leaders have the freedom to focus on the long-term goals of the company and do what's best for our customers and team members. We aren't constrained by focusing solely on quarterly results or chasing the company to attract a new owner.

This means you can trust us to support your project's needs, now and in the long term. With a 95% customer retention rate, we're proud to say that customers who work with us tend to stay with us.

Montefiore
Inspired Medicine

Omnichannel Marketing for one of New York City's leading hospitals

Montefiore carries a powerful mission: delivering healthcare as an inherent right. With every donation directly supporting patient care, our challenge was to elevate their story, inspire deeper engagement, and build a more committed donor community across both print and digital platforms.

To achieve this, we developed an integrated communications ecosystem—launching a new quarterly magazine, a flexible multi-template email program, and a cohesive event invitation system. Each component was designed to spotlight Montefiore's impact and create a unified presence from inbox to mailbox to in-person experiences.

From segmentation strategy to messaging cadence, every decision was crafted with intention. The result was a seamless, omnichannel brand experience that amplified Montefiore's mission and strengthened donor connection at every touchpoint.

KEEPING OUR CHILDREN HEALTHY

Montefiore
HEALTHCARE

Montefiore School Health Program
MSHP

WE'RE REINVENTING THE WAY NYC KIDS GET AND STAY HEALTHY

We make sure they have access to high-quality, comprehensive care regardless of their ability to pay. Our in-school health programs work to close and better prepare the future of business.

Montefiore's School Health Program (MSHP) provides comprehensive and coordinated primary and preventive health care to a population of children and adolescents in NYC public elementary, middle and high schools.

OUR GOAL IS NOTHING SHORT OF **100%**

Together we can help every kid in NYC stay healthy—and improve their chance at lifelong success.

For more information on the recruitment of sites and funding opportunities, please call Rachelle Bentley, Vice President & Chief Development Officer at 718.620.6100 or email grain@montefiore.org

Health outcomes have a direct impact on schools, which drive the way we advance.

OUR CHALLENGES

Many of our most vulnerable kids are falling behind. Lacking access and resources, their health issues can quickly spiral into big problems that seriously affect school performance, family life and even future success.

OUR GOAL IS SIMPLE: TO PROVIDE 100% OF OUR KIDS WITH EXCELLENT HEALTHCARE SO THEY CAN STAY IN SCHOOL.

Health outcomes have a direct impact on schools, which drive the way we advance.

OUR CHALLENGES

Many of our most vulnerable kids are falling behind. Lacking access and resources, their health issues can quickly spiral into big problems that seriously affect school performance, family life and even future success.

LIMITED ACCESS

For the kids and families we care for, it can be tough to find decent healthcare, let alone see a doctor. Facilities that accept Medicaid are few and far between, and most often provide limited or no services. Further, each visit for a child requires a care given to visit with, which can mean significant lost wages.

WEIGHT

While some New York families are trying to live healthier, obesity is skyrocketing in underserved populations. As with many epidemics, kids are often the most vulnerable—obesity continues to be one of the most dangerous health issues for our children.

ASTHMA

With proper management and treatment, childhood asthma is quite manageable. But children in poor urban neighborhoods, where environmental pollutants are common, suffer the most—they are forced to miss school. Their parents must also work to care for them, and visit to the ER are common.

TEEN PREGNANCY

In the neighborhoods we serve, teen pregnancy rates are staggering, among the highest in the country. The odds for our kids are tremendous—teenage girls who bear children are less likely to finish high school, more likely to become our next poor at adult, more likely to raise children with significant educational, behavioral and health deficiencies, and these things make it hard to raise daughters who become teen mothers themselves.

SCHOOL HEALTH

School health issues permeate our neighborhoods, which are plagued by broken homes and chronic underemployment. The resulting behavioral problems in children can drastically affect performance in school. What starts as one problem can quickly spiral into real problems at all.

Children who are healthy are 2X MORE LIKELY TO BE HOSPITALIZED

OUR SOLUTION

We know keeping kids healthy is the cornerstone for advancement. That's why we provide advanced, comprehensive health care to New York City kids through our in-school clinics—and our efforts extend well beyond the school year.

SCHOOL HEALTH CLINICS

Why deliver care in school? Simple—that's where the kids are! From the school nurse to advanced, comprehensive care delivered by highly trained nurses or doctors, dentists, nurse practitioners and mental health professionals.

COMMUNITY REACH

Our job continues even after the school bell rings. Each of our clinics is staffed with a full-time community outreach worker who organizes and encourages student participation in health programs and works hard to bring health education to parents, community leaders, church groups and other local associations.

ADVOCACY

Being in the trenches means that we spot problems early and can often help find solutions before issues have even surfaced. From the summer camps, we are in a prime position to talk to politicians and civic leaders candidly about potential policies that can help our city's most vulnerable kids. Many of these conversations have led to actions and policies that have made a significant difference in the lives of our students.
